

International Conference On

RENEWABLE ENERGY & CLIMATE CHANGE

Date: March 23-25, 2027

Venue: Munich, Germany

The International Conference on Renewable Energy & Climate Change (RECC 2027) brings together researchers, academicians, industry professionals, policymakers, and students from across the globe to discuss innovative solutions and emerging technologies in renewable energy and climate science. The conference aims to promote sustainable development, share cutting-edge research, and foster international collaboration to address global climate challenges.

Key Topics Include:

- Solar, Wind, and Hydro Energy Technologies
- Energy Storage and Smart Grid Systems
- Climate Change Mitigation and Adaptation Strategies
- Sustainable Development and Green Technologies
- Environmental Policy and Global Climate Agreements
- Carbon Capture and Emission Reduction Techniques

We look forward to welcoming you to Munich, Germany in March 2027.
